# SAFIDDINE ABDELFETAH

**Backend Developer | Node.js, NestJS, PostgreSQL | Full-Stack & Applied AI**

Médéa, Algeria | +213 659 235 442 | fettahsafi.6@gmail.com

## PROFESSIONAL SUMMARY

Backend developer building production APIs and complex business workflows with Node.js, NestJS, and PostgreSQL. At Fennec Booking, develops booking, payment, and travel-provider integration services for a multi-vertical travel platform with 10,000+ users. Full-stack across web and mobile (React, Next.js, React Native). Completed Master's research in applied AI: a multi-agent LLM system using LoRA fine-tuning, RAG, and model evaluation.

## TECHNICAL SKILLS

**Backend & APIs:** Node.js, TypeScript, JavaScript, NestJS, Express.js, REST APIs, Socket.IO, third-party API integration, layered architecture

**Databases:** PostgreSQL, Prisma ORM, MongoDB, Redis, Supabase, SQL

**Security & Integrations:** JWT, OAuth 2.0, rate limiting, encryption, SATIM payments, AI vision APIs, Firebase, Google Maps API, SendGrid

**Frontend & Mobile:** React, Next.js, React Native, Redux, HTML, CSS

**Applied AI & LLM:** LLM agents, LoRA fine-tuning, RAG, LangChain, FAISS, Sentence Transformers, Hugging Face, model quantization, prompt engineering, Python, FastAPI

**DevOps & Tooling:** Docker, Docker Compose, CI/CD, GitHub Actions, Git

## PROFESSIONAL EXPERIENCE

**Backend Developer** | Fennec Booking Oct 2025 – Present

- Build and maintain backend services with Node.js, NestJS, PostgreSQL, Prisma, and Redis for a multi-vertical travel-commerce platform covering flights, hotels, transfers, holiday packages, e-visas, eSIMs, travel insurance, and ferries, serving 10,000+ users.
- Develop booking and payment workflows, including external travel-provider integrations, SATIM payment processing, and pricing and commission logic.
- Implement real-time features with Socket.IO and Redis, background processing, and secured API flows using JWT/OAuth authentication and rate limiting.
- Integrate an AI vision service for structured passport data extraction, and support reliable releases through Docker containerization and GitHub Actions CI/CD.

**Freelance Full-Stack Developer** | Self-Employed 2022 – 2023

- Delivered MERN-stack websites for independent clients, including a book-printing shop, a library-management system, and a clothing e-commerce site, covering UI development, REST APIs, and database design.

## PROJECTS

**LLM-Agent Psychological Assessment Platform** | Master's Dissertation2024 – 2025

- Co-developed a research prototype with four specialized LLM agents (query formatting, therapeutic dialogue, sentiment analysis, clinical report generation), delivered through a React Native patient app and a Next.js clinician dashboard backed by Python, FastAPI, and Supabase.
- Fine-tuned LLaMA 3.2 with LoRA on psychotherapy datasets, built a RAG pipeline with LangChain, FAISS, and Sentence Transformers, and used a quantized Mistral 7B for report generation alongside DistilBERT and T5 components.
- Compared fine-tuned models against their base versions using cosine similarity, LLM-based judging, and accuracy, precision, recall, and F1 metrics.

**DZ-AutoImport** | Next.js, Tailwind CSS, GSAP

- Built a multilingual (French, Arabic with RTL support, English) car-import showroom prototype with Next.js (App Router), Tailwind CSS, and GSAP animations: vehicle catalog, brand pages, delivery information by wilaya, and WhatsApp quote requests. The live site displays demonstration data.

**FMD STORE** | E-commerce storefront

- Built and launched a live Arabic-language (RTL) storefront for smart insulated bottles, USB laptop backpacks, and desk clocks, with product galleries, colour variants, bundle pricing, a cash-on-delivery checkout flow, and WhatsApp-based order support.

## EDUCATION

**Master's Degree, Systems Engineering and Web Technologies**
Yahia Farès University of Médéa | 2023 – 2025
Dissertation: Design and Development of a Psychological Assessment Tool Based on LLM Agents.

**Bachelor's Degree, Computer Systems** | Yahia Farès University of Médéa | 2023

**Languages:** Arabic, French, English
